	Urgent	Not Urgent
Important	- Add an exam with a name, date, and topics - Make a day-by-day study schedule - Show how many days are left until each exam - Check off topics I've already studied - Save everything to a file so it's still there next time	- Give harder topics more study days - Set a max number of study hours per day - Edit or delete an exam - - Review each topic a second time close to the exam - Spread out the work when two exams are close together
Not Important	- Dates and counting days with datetime - Saving and loading data with JSON - Reading commands with argparse - Printing tables with tabulate	- A GUI or website - Google Calendar or Brightspace sync - Email or text reminders - AI practice questions - Accounts or sharing with friends
